

Security Documentation

This folder is the security baseline for **wealth-navigator**. It exists so that:

1. There's a single, honest description of how this app treats security.
2. The Plaid Production Security Questionnaire can be answered with real artifacts (no fabrication).
3. Future-me has a checklist to keep up to date.

Index

File	Topic	Plaid Q#
INFOSEC_POLICY.md	Umbrella security policy + security contact	Q1, Q2
ACCESS_CONTROL.md	Who can access what, MFA, account inventory	Q3, Q4, Q5
ENCRYPTION.md	TLS in-transit + at-rest encryption posture	Q6, Q7
VULN_MGMT.md	Vulnerability scanning, patching, EOL tracking	Q8
PRIVACY_POLICY.md	Public-facing privacy policy (also published in-app)	Q9
CONSENT.md	How user consent is captured before Plaid Link	Q10
DATA_RETENTION.md	What data is kept, for how long, and how it's deleted	Q11
QUESTIONNAIRE_ANSWERS.md	Mapping of each Plaid question to the answer + supporting artifact	—

How to use

- **Owner:** Matt Fellows (matt@tangiblevalue.com)
- **Review cadence:** every 12 months, or after any material change to architecture, dependencies, or scope.
- **Last reviewed:** 2026-05-06.

Source-of-truth principle

Every claim in these documents must reflect what the system *actually does*. If you change architecture, update the doc in the same PR — or update the doc and open a follow-up issue. Don't let aspirational text drift into the policy.
